DETAILED ACTION

Information Disclosure Statement

1. Applicant's prior art citation filed August 27, 2003 has been received, considered and placed of record.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this

Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1-3, 5-11, 13-17, 19-21 are rejected under 35 U.S.C. 102(b) as being anticipated by Rashidi (U.S. Patent No. 6,375,096).

As per claims 1-3, Rashidi teaches a fluid dispensing spray tip comprising a body (12) defining a passage for a fluid (44) and the passage terminates in a concave semispherical surface formed in the at least one wall (i.e. tapering portion of the passage) (see Fig. 11). The semispherical surface intersects a V-groove (144) formed in the body and forming an elongated aperture for dispensing fluid therethrough. A pair of diverging shaping lips and/or diverging walls extends from the aperture and shape the fluid dispensed through the aperture (see Fig. 1).

As per claims 5-7, 13-15 and 19-21, Rashidi teaches a fluid dispensing spray tip with a passage of which is in communication with the nozzle outlet (see

Fig. 11) and formed as an integral part of a nozzle; and the body defining a passage for a fluid is detachably fixed to a nozzle of the gun (see Fig. 10).

As per claims 8-11 and 16-17, Rashidi teaches a body defining a passage therethrough, and the passage has an inlet for receiving a pressurized fluid of which is dispensed by the valve (32). The pressurized fluid terminates in a reservoir (tapering portion of the nozzle) and the reservoir intersects a V-groove formed in the body and forming an elongated aperture for dispensing the fluid therethrough (as mentioned above).

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

3. Claims 4, 12 and 18 are rejected under 35 U.S.C. 103(a) as being unpatentable over Rashidi.

As per claims 4, 12 and 18, Rashidi has all the features of the invention but Rashidi does not mention explicitly the V-groove defines a V-angle of about between 15 and 30 degrees. It would have been obvious to one skilled artisan in the art at the time the invention was made to have made the V-groove at a V-angle of about between 15 degrees and 30 degrees to achieve the right amount of foam to be dispensed from the dispensing apparatus.

Conclusion
